

**Daryle Wolpa** is a master's-prepared nurse with extensive experience in pediatric critical care and emergency management. With over five years of bedside and clinical mentoring experience in a pediatric cardiac intensive care unit, Daryle has specialized training in ECMO, CRRT, and ventricular assist device (VAD) management. Daryle transitioned from critical care to serve as a nurse educator in a pediatric emergency department and currently works as an educator in emergency management for the enterprise at Ann & Robert H. Lurie Children's Hospital of Chicago.

In addition to designing and implementing emergency preparedness training, Daryle is an ENPC (Emergency Nursing Pediatric Course) instructor, emphasizing leadership, teamwork, and communication during high-pressure scenarios. She brings a unique, well-rounded background, holding an undergraduate degree in theatre and leveraging leadership skills gained from years of restaurant management to effectively engage diverse teams in healthcare education. Daryle is passionate about advancing the preparedness and resiliency of healthcare teams to deliver exceptional care during critical events.
