

John Hayes, CHSP
Life Safety Code Surveyor
The Joint Commission
RPI Certified Yellow Belt

John is a full time Life Safety Surveyor at The Joint Commission (TJC). In this role, he supports accredited organizations identify known and unknown risks in the Life Safety, Environment of Care, and Emergency Management chapters for all accreditation manuals for TJC.

John comes to TJC with 20+ years of healthcare experience, which started in facilities maintenance as an electrician, before transitioning into management as a supervisor, and then as a Facilities Director/ Safety Director in the Cleveland Area. In addition to facilities safety and plant operations John then progressed his career in becoming a Market Director then a Regional Director overseeing multiple Hospitals in multiple different States. John has a strong background in planning and construction and has overseen multiple hospital construction projects starting from the ground up. John also helped develop a “Green” team to help reduce the carbon footprint at his facilities.

John obtained his degrees from Ashford University in Business Leadership and Educational Studies. He is also a Certified Healthcare Safety Professional (CHSP), a member of the American Society for Healthcare Engineering (ASHE), and a member of National Facilities Management and Technology (NFMT). John resides in the North Texas.
